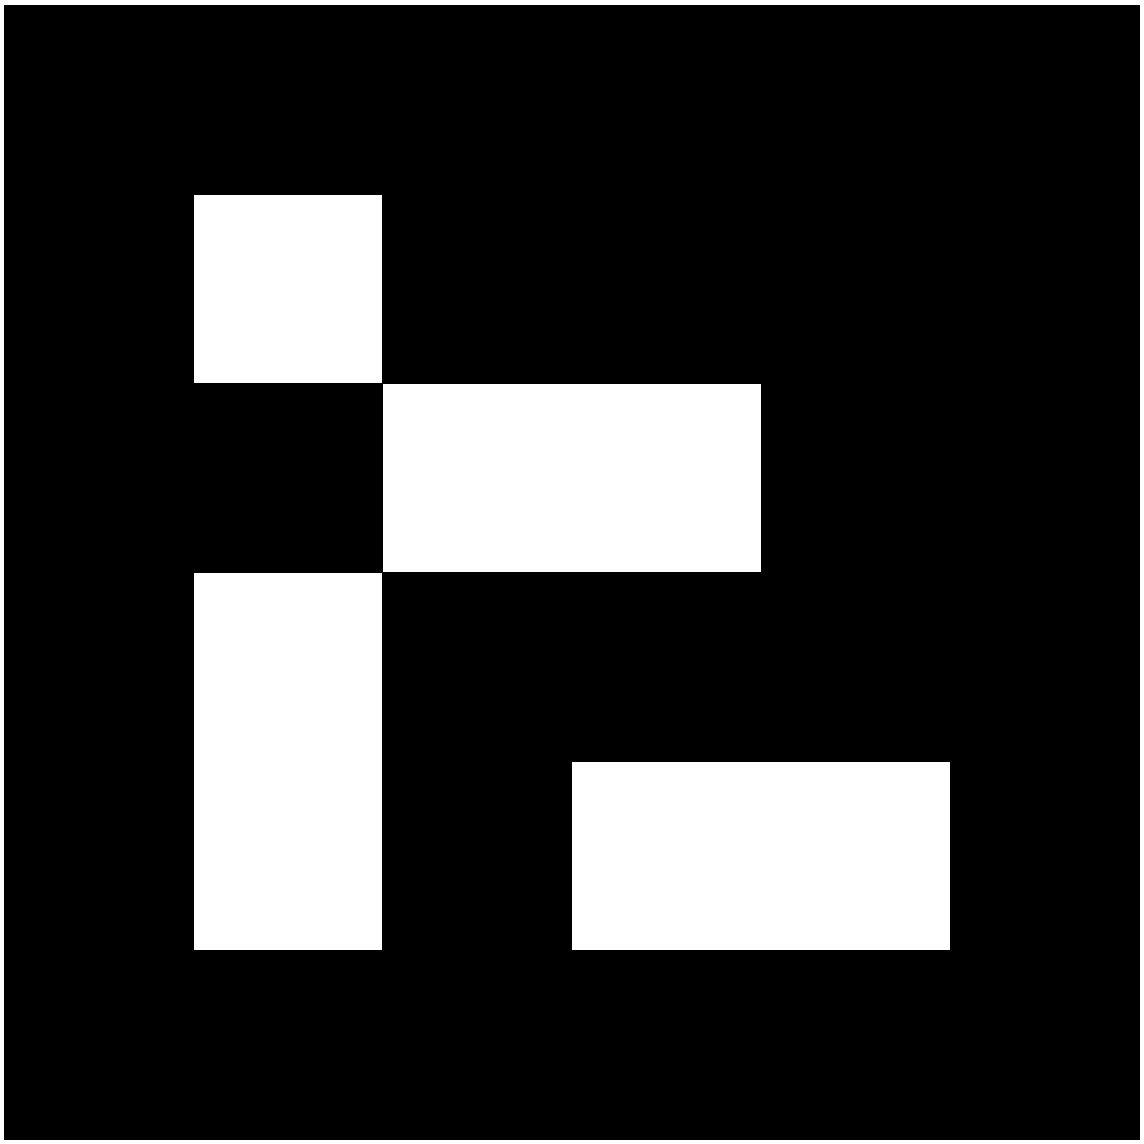
FRONT ▲



ID 20

VEHICLE TAG — the ONE tag on the car (Branch A)

DICT_4X4_50 | nominal side 150.0 mm (outer edge of black square)

100.0 mm

SCALE CHECK — measure the bar above. If it is not 100.0 mm the sheet printed at the wrong scale; reprint at 100%.

CUT ON THE DASHED LINE, NOT AT THE BLACK EDGE — the white margin is the quiet zone. Without it the black border merges into the chassis and the detector cannot see the tag (Sept: 4-16%).
Mount FLAT and LEVEL on a raised plate above the deck, never on the sloped bodywork. FRONT forward.
Measure tag height above the floor and offset from the rear axle — track_ground.py needs both.

Measured side (mm): _____ Height above floor (mm): _____

Offset from rear axle (mm): _____ Date mounted: _____
