
ID 30

SCALE BAR ENDPOINT — independent metric check

DICT_4X4_50 | nominal side 150.0 mm (outer edge of black square)

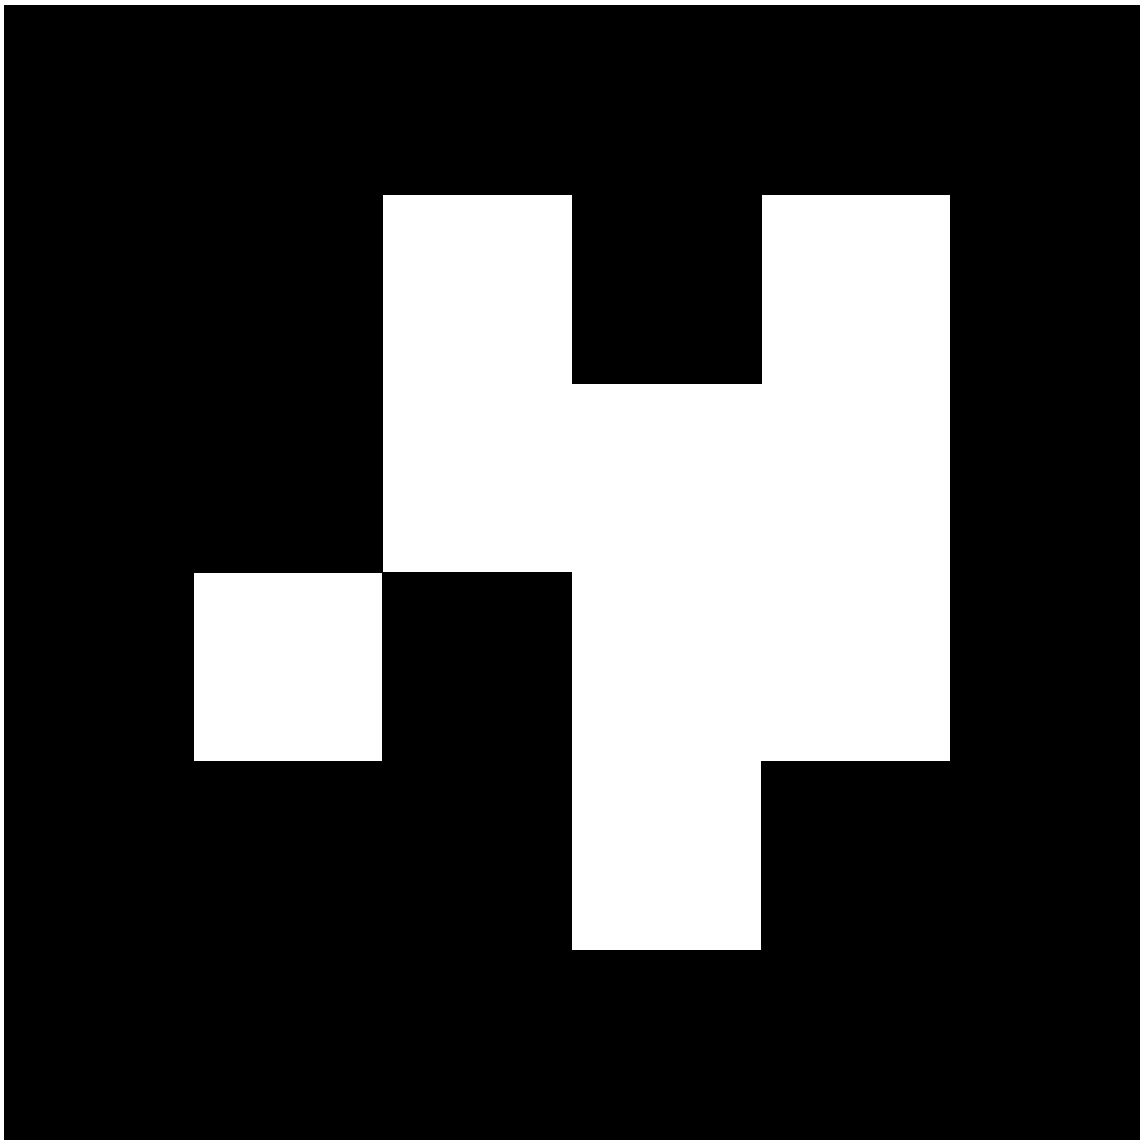
100.0 mm

SCALE CHECK — measure the bar above. If it is not 100.0 mm the sheet printed at the wrong scale; reprint at 100%.

Mount IDs 30 and 31 on one rigid bar (aluminium extrusion / straight timber), coplanar.
Measure centre-to-centre with a laser distance meter or steel tape, twice, and average.
This single long baseline is the cross-check on the scale the GCP network solves for —
keep the bar in frame during the capture, lying in the track plane.

Measured side (mm): _____ Bar centre-centre (mm): _____

Repeat measurement (mm): _____



ID 31
